## Trip overview

Mendoza (700m)– Penitentes (2700m)– Aconcagua Provincial Park -  
Confluencia(3300m) – Base Camp Plaza de Mulas (4250m)– Plaza Canada (4900m)  
– Nido de Condores (5500m) – Berlin (5900m) – Summit of Mt. Aconcagua (6961m)

## Why go there?

Aconcagua (6961m) is the highest mountain in South America, one of the 7 Summits. It is located in Argentina in the Province of Mendoza. The name may have come from several possible origins: Kon-Kawa ("Snowy Peak") - from the Argentine aboriginals, the Aymara; Aconca-Hue ("Coming from Other Side") – from the Chilean Araucano; Akon-Kahuak ("Sentinel of Stone") – from the Quechua. From the top of this mountain, you can revel in the breath-taking views of the amazing white ranges of Cordillera de Los Andes.

As a climbing objective Aconcagua offers a rich variety of interesting routes of all the technical levels. The Normal (or NW) Route is physically very demanding, but not really technical.

## Route description:

Our expedition starts in the town of Mendoza. On arrival we have an overnight stay in Diplomatic hotel to obtain climbing permits. On day two we drive to Penitentes (a small village next to Puente del Inca) and on the next day the climb starts (by NR). We stay two nights in Confluencia Base Camp (3300m) and, for better acclimatization, two nights in Plaza de Mulas Base Camp (4350m). After that with the help of experienced guides and porters we begin to establish high camps: Canada (4900m), Nido de Condores (5500m) and Berlin (5900m). On the 12th day we make a bid for the summit. And of course we have a reserve day to make up for bad weather. The expedition ends in Mendoza, where we stay for one night before saying a hearty thankful good-bye to these places.

### **F.A.Q.**

#### **Tips guidelines (important information!)**

You entrust your life, health, your time and money to the guides. And the guides take this responsibility for you and for the success of the whole trip. They are doing this 24 hours.

10-20 USD per day is expected as the normal amount of tips for the Guides and the staff of the program. If you liked everything about the trip, please don't forget to thank them. You can give the tips directly to the Main Guide and he will distribute it among the staff.

#### **Necessary travel papers (documents)**

Passport to travel abroad

Argentine visa (if necessary, depends on your citizenship)

Special questionnaire

Medical and climbing insurance covering all climbing risks and helicopter evacuation.

#### **By air and by land**

You can get to Mendoza by many international flights (via Santiago de Chile (SCL) or Sao Paulo), by domestic flights from Buenos Aires and by bus from Buenos Aires or Santiago.

#### **Accommodation**

2 nights in hotels (SNG, BB)

16 nights camping (DBL, FB)

#### **Meals**

Breakfasts in the hotel, full board while in camps

#### **Staff**

Mountain guide from 7 Summits Club,

porters helping to pitch high camps, cooks and kitchen staff, muleteers

### **Health and medical insurance**

Our guide will have a first aid kit and we strongly recommend to bring your own specific medicines you might need. Besides, we recommend to start taking polyvitamins 3 weeks before the expedition. Also would be very useful to try to acclimatize on some peak over 5000m and test your system before you come to Aconcagua.

### **Weather**

The normal time for expeditions is from December to March. A colder month could be better in terms of weather, normally more stable when cold.

Generally from December to March. Experience indicates that, if the "peak" months are the coldest, its climate is more stable. It would be good to calculate correctly the time you have available, including some days of "reserve" to wait for good weather in case of storms. A "bonnet of smoke", white wind over Aconcagua's top, is a sign of tempest in the heights and you must not go further on.

### **Extra expenses**

Permit (between USD 800-900, depending on your nationality and the start date of the climb), see <http://formulariosambiente.mendoza.gov.ar/images/aconcagua/tarifas/TarifasPPA2018-19.pdf> for the latest fees.

### **Possibility of renting personal equipment**

There are several local gear shops with good gear, but in the high season many popular sizes and items can run out, so it is best to bring as much of your own gear as possible.

### **Personal gear**

Personal gear:

Heavy-weight fleece / pile jacket

Light/medium-weight, long thermal underwear shirt (polypropylene/capilene)

Long underwear shirt, medium weight fleece shirt,

Water proof / breathable jacket with hood (Gore Tex is strongly recommended)

Long sleeve, light weight shirt

Down or hollow fiber filled jacket with a hood, large enough to put on over a fleece jacket

Fleece pants (with full side zips to allow ventilation)

Two pairs of long underwear pants (one light-weight and one medium-weight)  
Waterproof / breathable pants (or bib pants) with full side zips for easy putting on and taking off  
Light weight trekking boots  
Climbing expedition boots  
Crampons (well fitting, preferably "step-in") with a maintenance&repairing kit
