Good advice

Climbing Everest is dangerous. No one can guarantee your safety at 7000m and much less at 8000m and over. So in our price, we include personal high altitude Sherpa-guides for the summit attempt in addition to shared 'Western' guides.

According to our long Everest experience, this is a must, especially if you have no previous experience in climbing above 8000m. A Sherpa-guide will enormously enhance your safety and chances of summiting successfully. He will guide you, carry your extra oxygen bottles (and help you down if need be).

Tips guidelines (important information!)

You entrust your life, health, your time and money to the guides. And the guides take this responsibility for you and for the success of the whole trip. They are doing this 24 hours per day. 10-20 USD per day is expected as the normal amount of tips for the Guides and the staff of the program. If you liked everything about the trip, please don't forget to thank them. You can give the tips directly to the Main Guide and he will distribute it among the staff; additionally, you can thank specific staff members.

Weather

Weather on Everest is very changeable. Every day we analyze different forecasts and use them to adjust our acclimatization and ascent schedules.
